

Want to be a pro?

Professional drivers take their job seriously by doing it safely

Getting the tarp on the load can be a real pain

Employers

- Invest in tarping stations or rolling staircases.

Workers

- Ask the forklift driver to put the tarp on top of the load for you.
- Use a partner to help put on and pull off the tarp.
- Stay aware of the edge of the trailer or load so you don't fall.
- Make sure you have stable footing if you use a ladder.
