

# Don't Fall for It

Not paying attention to the details will make even a simple job hazardous.

*Falls from the same level account for 8% of all trucking injuries.*

[www.KeepTruckingSafe.org](http://www.KeepTruckingSafe.org)

*Identify it,  
deal with it*

## Prevent falls while securing a load

- Inspect and replace worn straps and chains.
- Inspect and replace bent cargo bars, worn pad ends or damaged locking mechanisms.
- Upgrade to ratchet winch tie downs to reduce the hazards from using a winch bar.
- Maintain solid footing and a stable body position.

**These injuries don't just happen**
